LiPo Charger

Revision Notes
Changes to v13 (date 4/3/12)
- Added breakout pins for PS and EN
- Route traces on IC directly away from pads to prevent uneven reflow
- Move vias under IC so they’re not as close to side ground pads
- Added jumper to disable UVLO

Switching Regulator

*Close jumper SJ2 to disable UVLO &1

#UCC can be 3.3V or 5V depending on jumper
#5V is the default, UCC
